

## **Lead the Candle of light**

Dear Nandini Hussain,

Thanks for your recent article about science education in school of our beloved motherland. I think that Science is not memorizing thing. These message should be sent to our future generation by the school teacher, other educationists of our country. If this is possible, then we can hope, our science and technology field will be developed in near future.

Best wishes and regards

Md. Dalilur Rahaman
