

Dear Nandini Hussain,

First and foremost I would like to congratulate you for your good writing about the concurrent issue of our country. I appreciate your effort for doing better for our country through writing. I am completely agree with you that there is no need of madrasha education in our country. One think you have mentioned that son or daughter poltical person, upper class are going to abroad for their education. It is true. But they do not want to realize the education condition of our country. It is really surprising one. However,you have just mentioned two people in your writing who can take initiative for realizing the madrasha education is appropriate or not at the present situation of our country. I do not want to agree with your proposal. But I think there are lot of educated and renowed people in different field who can do work for the betterment of our country.

Yours truly
