

Dear N Hussain,

Assalamualikum.

Read your topic regarding practice of Science in our school/college.I have liked it.

I am a student of science group. It is correct that I have read the topics of lessons for passing the exams.I was not getting enough interest in the science class.Though finally I got masters in physics.

But I have a mind to open school on Science. And I will try my best to teach and arise interest on science to the learners.

At the same time I am differing the point that Religion is a obstacle to science.Actually it is not.Hope you will think this point in broader angle.

Again I am appreciating your all sincere consciousness in science.

Khaleque
